

Dear Customer

Internet Initiative Japan Inc.

"Japan Travel SIM" large capacity type to be added to lineup, sales of eSIM to commence at LAWSON nationwide

Starting February 6, 2024, IJ will successively commence sales of "Japan Travel SIM" in large-capacity configurations that go up to 10GB, 15GB, 25GB, 35GB and 55GB, which were heavily requested by customers. Currently, this service can be purchased in a package configuration that includes a SIM card (in multiple sizes spanning standard, micro and nano) at mass-retailers and distributors at airports, stations and other locations across Japan. eSIM Selectable Gift Cards will also newly become available for purchase at LAWSON nationwide.

* Japan Travel SIM is a data communication service for foreign travelers and temporary returnees to Japan. It cannot be paired with a Voice Call Function or SMS Function.

* When using devices with the SIM lock enabled, the SIM lock has to be disengaged. Additionally, use of eSIM requires an eSIM-compatible device.

* When purchasing eSIM Selectable Gift Cards at the register, customers will be asked to choose their desired data communication capacity from seven total types: 3GB, 6GB, 10GB, 15GB, 25GB, 35GB and 55GB. After completing payment, by accessing a dedicated website in a Wi-Fi environment and entering the entry code on the back of the card and other required information, customers can download an eSIM profile and use data communication.

*1. Additional data communication capacity can be purchased with the use of an IJmio Coupon Card or

Brastel Card. The duration of use for newly-added data communication capacity lasts until the end of the month that falls upon three months after the day of charge.

[Brastel Card](#)

Note that data communication capacity cannot be added to SIM cards whose duration of use has expired.

*2. Communication speeds vary according to the device used. When outside of 4G (LTE) areas, 3G communication can be used.

*3. eSIM are only carried at LAWSON.
